

As an over the road truck driver I have come to rely on the services of XM Satellite radio. XM serves my needs for news, music, entertainment, traffic and weather reports many times in areas where there either are no other broadcasts I can receive or where those broadcasts are in a language I do not speak. If the FCC were to limit or eliminate the programming on XM it would make my job more difficult and would force me to return to taking my attention off the important task of controlling up to 80,000 pounds to search for a local radio station every hour or so. I fully support XM and any other entity which wants to get into the satellite radio business and will use my vote when election time comes to try and ensure I am able to get the programming I want and need. Thank You for your time,

Marlon Knapp
